

Every photograph is unique

A Kettering based commercial, Corporate and PR photographer; Wyvern Photography provides a high quality business-to-business photographic service to the commercial, corporate and public sector. Clients range from small and medium business looking for PR help to large international NGO's and youth organisations needing reportage or documentary photography.

We offer the customer a fresh reportage approach to commercial press & PR photography. Alternatively, we can offer a more classical or contemporary style of photography that some customers have come to prefer.

Our aim is to make the customer relaxed with our work, almost to the point that they forget the photographer is present

Wyvern Photography's Paul Lashmar says, "We offer a high quality, professional and creative photographic service that will deliver results, the main one being how to get the right message across whilst still giving the **best value**. At Wyvern Photography *we believe that the client's brief is paramount and should not be watered down or compromised*"

Services offered.

Commercial Photography: tailored to suite the style and image the client wishes to represent. Working on site with the latest digital photographic technology to provide the package of images that can be used again and again.

Corporate & events photography: Whether it be a sales conference, awards dinner or an open day and event for your clients, speak to us about the best way to photograph the event. If needed, we even have facilities to send photographs to media organisations as part of a press release to promote the event both before and afterwards.

Press & PR Photography: As an experienced press photographer, we can provide you with photography relevant to your press releases or media events that will increase the chance of getting published and so your organisation promoted to the public and clients. With links to media organisations, we can arrange for photographs to be transmitted on your behalf to the relevant people within the media.
